DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

3. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant requires that the first and second game machines "are set" based on competition game results. What is "set" is not disclosed or taught, therefore it is unclear as to how the claim adds any structure or further limits the invention.

4. Claims 6 and 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant uses various pronouns such as "own game machine" or "either of them", which are indefinite and fail to particularly point out the nouns that the pronouns are referring to.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-7 rejected under 35 U.S.C. 102(a) as being anticipated by Junkin '862. Junkin teaches a network game system having a plurality of elements that allows play of a real time game element trading game (Abstract). The network has communication, interactive terminal, servers, and storage devices (Fig. 1). Junkin describes a computer displays a team roster database that shows possession information (2:41-42), multiple computers communicating over a network that teach discrimination between machines (Fig. 1 and 2:43-45), a menu for selecting and trading team players (8:66-67) that shows transaction information providing, presentation, selection of elements available for trade. Information updating is taught through real time update of team information (6:25-37).

In re claim 2, a selected game element is removed when possession is obtained from another game participant/machine.

In re claim 3, the game is a predetermined competition of baseball or hockey (4:30).

In re claim 4, the menu presented to a user at a terminal device provides selection and decision information (8:54-67).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Peppel '216, discloses the use of trading game elements over a network.

Ng '855, discloses a network game, where one game machine can obtain a game element from another game machine.

Kagan et al. '045, discloses an interactive multiplayer game system, transmitting data between devices.

Art Unit: 3713

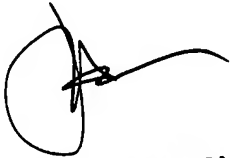

Sides '831, discloses a network work game device for playing competitive games with other game machines/players.
